

Biodiesel Credit.txt

The \$1.00 per gallon Federal Biodiesel Tax Credit expires on December 31st, 2009.

Starting January 1st, 2010, Hartland will no longer have a line item credit for biodiesel blends on our invoices. (.02 for B2, .05 for B5, .10 for B10, .20 for B20).

If the Federal Tax Credit is renewed retroactively in the future, and Hartland receives those credits, Hartland plans on passing on the retroactive credits by credit and rebilling every applicable invoice.

While the industry is fairly confident in anticipation that Congress will renew the blenders credit and that the legislation will include a retroactive component; we urge caution in terms of "counting on" the tax credit in your business decisions
